Job Description

**Internship Title**
Project Development Analyst Intern, Commercial Sales

**Internship Description**
Intern will assist project development analysts in the Commercial Sales team in various research and project development tasks to support the development of solar and battery storage projects for SunPower’s commercial customers. Intern will gain exposure to the sales development lifecycle, as well as assist in various research and market development activities.

Details:
- **Terms:** Internship, Part-time, Temporary. This is a paid internship through UCI’s Energize College Program. The internship is set at 6.25 hours/week for 62.5 total internship hours. The rate of pay is $12/hour. This position is not eligible for company benefits.
- **Location:** SunPower, 2125 East Katella Ave. Suite 220. Anaheim, CA 92806
- **Timeframe:** 10 weeks, beginning the first week of April. Exact day(s) will be decided upon with intern manager based upon intern’s school schedule.

We encourage candidates to treat this internship as an extended interview with the possibility of full-time/contracted employment with SunPower in the future (depending on market conditions and staffing needs). Candidates who are in the position of doing so immediately or soon after completion of the internship (e.g. seniors, night/weekend students, etc.) may receive preference in the selection process.

**Specific Qualifications**
- Open-minded and proactive attitude with tenacity to go extra mile
- Organized with the ability to prioritize tasks effectively
- Clear communicator with technical writing skills
- Strong math and analytical skills
- Proficiency in Excel, Word, and PowerPoint
- Ability to apply data-driven concepts, such as proportions and regressions, to solve business challenges
- Excellent attention to detail

**Acquired Skills**
- Application of market research principles and skills
- Application of sales development tools
- Introduction to various solar PV development and analytical tools
