

CONSERVE WATER

How UCI staff can conserve water while working...

ON CAMPUS

Refill your reusable water bottle. UCI has more than 160 water bottle filling stations. Locate them [here](#).

Every drop counts. **Report water leaks to Facilities Management for repair.** Submit service request [here](#).

Grabbing lunch on campus? [Look for symbols](#) in the dining locations that display Vegan, Vegetarian and Plant Forward menu offerings.

Visiting the dining halls? At each residential dining food station a red, yellow or green Anteater Paw is placed next to every menu item to showcase water usage impact.

[Learn about campus landscaping practices.](#) 90 percent of campus landscaping uses recycled water!

REMOTELY FROM HOME

Use every drop. Capture the excess grey water from sinks and showers by placing a bucket or large bowl under the faucet. Use this water for your garden or house plants.

Run only full loads. This goes for both dishwasher and laundry machines.

Water by hand. Consider hand watering if you have a small garden area. Manually watering with a hose typically uses 33 percent less water than an automatic irrigation system.

ON CAMPUS OR REMOTELY

Be conscious of how much water you use. **Turn off the faucet when lathering up your hands with soap.**

Install low-flow restrictors to faucets. These fixtures can reduce water by as much as 60 percent without compromising water pressure.

Did You Know?

A leaky faucet dripping at the rate of just one drip per second can waste more than **3,000 gallons** of water per year. That's the average amount of water needed to take **180 showers!** Calculate your water footprint [here](#).
